

Keeping the Beat

Student Heart Screen

Metro Health is proud to offer a **limited number of free heart screens to high school students ages 14-18.**

This cardiovascular screen attempts to identify pre-existing heart conditions and abnormalities which may place student athletes at increased risk of disease progression or even sudden cardiac death. This screen takes about 20 minutes

and includes an EKG and ECHO (if indicated) and may help to identify pre-existing conditions that parents should be aware of.

The Wes Leonard Heart Team will also be onsite to provide CPR training and AED education. Call 252-1540 with questions.

Sponsored in part by

Registration required. Space is limited.
